Construction Project Design and
Management Consultants

Cotleigh Consulting

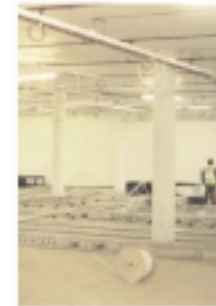

Cotleigh Consulting is a multi-disciplinary building design company with extensive experience in the fields of residential properties, warehousing, distribution facilities for specialised end user clients, retail outlets, office refurbishments and highly serviced computer installations.

In our capacity as Chartered Architects we design all types of buildings. As Project Managers and Planning Supervisors we control construction projects and as Chartered Building Surveyors we understand the requirements of the commercial and residential property markets.

We are equipped with IT, CAD and graphics facilities. Our overheads are managed so as to ensure that our fees are competitive in today's marketplace and each project, whatever its size, remains under the personal control of a Practice Director.
